

In 2008, Marin and Sonoma Counties voters had the foresight to create SMART. You voted for a modern train system to bridge county lines and connect to the ferry in Larkspur.

You wanted a green transportation system, a way to travel without sitting in traffic - taking cars off Highway 101.

SMART has delivered on that promise - despite serious obstacles.

When the recession hit in 2009, the bond market crashed, slashing more than \$100 million in projected revenue.

Despite this setback, SMART still got a world class transportation system up and running by winning \$328 million in regional, state and federal matching funds.

So far, SMART has carried over 1.6 million passengers, including over 5,900 passengers who require wheelchair access and 159,000 bicyclists.

In December, SMART opened the Larkspur station to connect to the ferry. In January, SMART revamped the commuter schedule to run trains every 32 minutes. Now, SMART is at a crossroads. Measure I is critical to SMART's future.

Measure I would extend SMART's ¼ of one cent sales tax with NO TAX INCREASE.

Measure I would ensure SMART's financial stability and allow restructuring of construction debt. This would save \$12.2 million annually, fully funding operations from Larkspur to Windsor - and with state and federal help on to Healdsburg and Cloverdale - for the next 30 years.

Vote YES on Measure I to:

- Help reduce congestion on Highway 101 and local roads
- Support SMART service to additional cities
- Increase the frequency of SMART trains
- Build more bicycle and walking paths connecting SMART stations
- Fund safety enhancements along the rail line
- Add additional parking to SMART stations

We finally have a modern train system for Marin and Sonoma Counties. Let's keep it rolling. Join seniors, environmentalists, business and community leaders - vote YES on Measure I. Visit www.StayGreenKeepSMART.org
